

THE SYSTEM FOR HIGHEST QUALITY DEMANDS

LOBA and Wakol Connected Systems – perfect for a quick and safe system set-up for a cool concrete look.

Wakol Levelling Compounds and LOBA finishes are perfectly matched thanks to intensive and continuous cooperation in product development. **Your advantages:**

- Fast system set-up – only 3 days
- Maximum application safety with complete set-up recommendations and detailed, step-by-step instructions
- Workflow consistent with trade standards
- Few tools required
- Low set-up height – from 3 mm
- Maximum protection for processors – very low emissions, EMICODE® EC1 PLUS

OUR PRODUCTS FOR YOUR SUCCESS

When working with the dust-reduced levelling compounds **WAKOL Z 610 Levelling Compound, dust-reduced** and **WAKOL Z 615 Levelling Compound, dust-reduced** up to 90% less dust develops during mixing – a welcome advantage for the processor and the non-commercial client.

The LOBA system with **FactoryBase** and **2K FactoryStyle** was developed especially for the finishing of levelling compounds. The primer ensures reliable adhesion of the finish to the levelling compound. The extra-matt finish preserves the natural color of the levelling compound and is particularly abrasion-resistant.

YOUR FLOOR WITH AN INDUSTRIAL LOOK

Cool, individual, timeless – finished levelling compound floors with a minimalist, sophisticated look

PURIST PROTAGONIST: FINISHED LEVELLING COMPOUND FLOORING

Concrete looks are more popular than ever in modern architecture. The building material matches the trendy loft design perfectly, which is inspired by the minimalist style of industrial and commercial buildings.

In the past, levelling compounds were mainly used as subfloor, but today they are made as visible as possible and deliberately integrated into the interior design as flooring. In addition to their visual appearance, there are other tangible benefits of finished levelling compound floors:

- Always unique – no two floors are alike
- High resistance and durability (insensitive to point loads)
- Easy to clean because there are no joints

ALWAYS UNIQUE

Different application techniques lead to individual surfaces – a finished levelling compound floor is always unique! Here are a few examples:

FLOORS WITH CHARACTER

Finished levelling compound floors deliver high resilience, durability and individuality. They show their strengths equally well in private and commercial environments. Areas of application include, for example:

- Living rooms and bedrooms
- Boutiques, shops and showrooms
- Hobby rooms
- Hotel industry
- Art galleries, museums
